“Since its inception in 1990, our goal has remained simple. We take great pride in our approach and we aspire to remedy the underlying cause of your condition and not just the presenting symptoms. This in-depth understanding has been the key for successful treatment outcomes. We aim to provide you with self-treatment tools and help you prevent recurrence of the problem.”

## Ultrasound imaging and guided injection therapy

- Real time ultrasound scanner - state of the art machine for muscle retraining, monitoring of recovery and supplementation of clinical diagnosis
- Below is a shoulder ultrasound scan image done at our clinic on a patient during a treatment session

- Injections to joints and muscles under ultrasound scan guidance and administered by a highly trained extended scope practitioner physiotherapist (ESP)

*“Diagnosis was spot on. Treatment plan was appropriate and pitched exactly to what was needed, gradual phase back in to exercise was discussed and the sports injury is now resolved- Thank you!” - C T*

# EalingPhysio
